This game is a drastically simplified version of the 3rd Yosseeya dice game. **For beginners!** So that small children may have a chance to get to know the principles of dice gaming.
 [The special dice may be replaced by an normal dice and a set of special dice icons.]

Goal of the game: You try to have as many cage bars as possible.

Preparation: You cover the picture of the bird with 13 bars. You have the special dice at hand. [Or the dice replacing set.] Each player has the possibility to easily reach the sticks.

How to play the game: Each player in turn throws the dice. The special dice shows either red or green. The upper side of the dice is important. (Small children might not know.)
 [With an normal dice you put the neutral token on the icon according to the thrown dice.
 Thus the player knows the colour that he has to refer to.]

GREEN = be **free** = the player takes a cage bar.

RED = stay **imprisoned** = the player does not take a bar, he passes the dice on.

End of the game: when there is no bar left.

Winner: the player who has taken the most bars.
