

midi - viddibbi

the little game of quick watching

Age: 4 +
Players: 2 +
Time: 5 - 15 minutes
Category: card game
Goal: get the most cards
Author: Blanche Kails 6.2.2016

Object of the game: meticulous observing
audible and correct speaking
vocabulary training
reaction speed improving

Material: 1 set = 21 midi-viddibbi-cards
each card shows 5 pictures
each pair of cards has one picture in common

Preparation: Each player gets one card. The remaining cards are placed face down on the table to form the draw pile. Each player puts his card face up on the table.

How to play the game: All the players begin at the same time. The top card of the draw pile is being returned and put face up on the draw pile. Now each player compares **his card** with the top card of the draw pile to discern the picture that his card and the card in the middle of the table have in common. The first player who calls the right name of the common picture takes the card and puts it face up on his own card. One hand is done. To go on, the player who has won the last card returns and puts back the top card of the draw pile.

And so on:

- return the top card of the draw pile,
- compare your own card with this top card,
- the quickest wins the top card and puts it face up on his own pile

End of the game: when the draw pile is empty.

Winner is the player who has got the most cards.
